PROFILE

Cybersecurity Professional with hands-on experience in Security Operations, threat detection, and automation. Currently a Senior Engineer at Presidio, focused on enhancing incident response and detection through playbooks and SIEM tuning. Proficient in QRadar, XSOAR, and Sentinel, with a strong foundation in client reporting and SOC optimization. Backed by an MSc in Cybersecurity, key certifications, and a record of improving operational efficiency in enterprise environments.

SKILLS

Tools
QRadar, XSOAR, Sentinel, Sophos, Qualys, Splunk, BigFix

Programming Languages
KQL, AQL, Python, C, HTML, MySQL, Node JS, Rest API

Operating Systems
Windows, Kali, Parrot OS, Ubuntu, RedHat

WORK EXPERIENCE

Presidio, Europe

SOC Senior Engineer 05/2025 – Present

- Lead Microsoft Sentinel deployments and customer onboarding, including workspace configuration, data connectors, log ingestion, security integrations and Sentinel configuration.
- Implement SIEM engineering and ingestion optimisation, including DCRs, AMA, Syslog/CEF, log source configuration and monitoring of Sentinel data consumption.
- Manage Azure DevOps CI/CD for Sentinel analytics rules, including Git workflows, pull requests, peer reviews and automated deployments.
- Troubleshoot and resolve Microsoft Sentinel and IBM QRadar issues, including data ingestion, connectors, agents, log sources, DSMs, performance and rule-related issues.
- Develop and maintain Cortex XSOAR SOAR playbooks and integrations for incident ingestion, enrichment, IOC analysis, ticketing and automated response workflows.
- Provide customer-facing security engineering support, owning technical issues through investigation and resolution, while conducting peer reviews and raising changes through CAB.
- Actively contributed to evolving security operations processes and strategic improvements in SOC workflows.

SOC Analyst 02/2023 – 05/2025

- Investigated and triaged security incidents across diverse client environments, coordinating with internal teams and client stakeholders to assess, contain, and mitigate threats.
- Conducted real-time analysis and correlation of security events and logs from multiple sources, ensuring accurate prioritization and response.
- Created and presented monthly SOC service reports to clients, summarizing key incidents, trends, and recommendations to improve security posture.
- Developed and maintained response playbooks, workflows, and automation within XSOAR to support structured and repeatable incident handling.
- Administered QRadar SIEM by fine-tuning rules, auditing use cases, and troubleshooting parsing issues, ensuring alignment with the MITRE ATT&CK framework and Cyber Kill Chain methodologies.

Cybersecurity Intern 06/2022 – 02/2023

PwC, Ireland

- Monitored all systems, applications, hosts, data ingestion, forwarder status, and system health to maintain infrastructure compliance.
- Automation of reports, dashboards, and metrics for Security Operations and executive reporting for the Ireland Index using tools such as Ansible.
- Performed Incident Response and Security Operations tasks on incidents like Phishing, Malware, DDOS Mitigation, and documentation of new policies.
- Collaborated with the Global Security team and local IT to ensure compliance with Local and Global Information Security Policies.
- Performed Security Risk Assessments for SaaS, Desktop Applications, and Custom Build solutions.

Trainee and Security Analyst Intern 06/2020 – 11/2020
SOC Experts

- Performed root cause analysis and recommended resolution for security incidents alerted by Splunk.
- Analyzed log files and validated incidents by using runbooks.
- Assisted the team in maintaining reports for Key Performance Indicators.

EDUCATION

MSc in Cybersecurity 2021 – 2022
National College of Ireland
Relevant Coursework: Network Security and Penetration Testing, Forensics and eDiscovery, Incident Response and Analytics, Malware Analysis, Cryptography, Secure Programming for Web and Application Development.

Bachelor of Engineering in Information Technology 2017 – 2021
A. P. Shah Institute of Technology | Mumbai University
Relevant Coursework: Applied Mathematics, Security Lab, Python Lab, Cryptography & Network Security, Operating Systems, IoT Lab, Cloud Computing & Services, Digital Forensics, Data Structure & Analysis, and Automata Theory.

PROJECTS

Secure Web Portal for HRMS Application

- Developed a secure web-based portal using HTML, CSS, NodeJS, and a PostgreSQL backend to track employees' attendance and manage their leaves.
- Secured the backend from various attacks like SQLi, Broken Access Control, and Cryptographic attacks.
- Performed software testing using apps like SonarQube and Conducted Manual Code Reviews of the code.

Educhain

- Developed a Decentralized Application (DAPP) on Ethereum block-chain to allow institutes to store all the certificates issued on Blockchain which can be publicly verified worldwide.
- Implemented the Smart Contract in Solidity to store all the certificate data.
- Designed the front end of the application using React JS and deployed a Node JS server for the back end.

CERTIFICATES

SC-200: Security Operations Analyst Associate
Microsoft

ET15 - Sophos Central Endpoint and Server v4.0 - Engineer
Sophos Central

AWS Certified Cloud Practitioner
Amazon Web Services (AWS)

Certified Security Automation Engineer (PCSAE)
Palo Alto Networks

Certified Ethical Hacker v10
EC-Council

Cybersecurity Foundations
Palo Alto Networks Cybersecurity Academy

ACHIEVEMENTS

- Presented and published a paper on Blockchain Framework at the International Conference on Soft Computing for Security Applications (ICSCS2021).
- Organised various programs on Cloud Computing, Machine Learning, Node JS, GitHub, and Dockers, and coordinated various state and national-level coding competitions as the President of the IT Students Association.
- Appointed as the Head of the Technical Team at OJUS – Radiance of Euphoria, the cultural fest of A. P. Shah Institute of Technology held during January 2020 and developed a website for managing registrations for all the events.
- Secured First position at Smart City National Level Ideathon organized by Lakshya on 29 March 2019.
- Worked as Teaching Assistant for Java and Python Programming Lab reinforcing student learning of skills and materials through daily and weekly check-ins and informal assessments.
